

LEXI MICHEL

FRONT END DEVELOPER

SUMMARY

Junior Web Developer specializing in front-end development for full stack web applications. Experience with HTML, CSS and JavaScript libraries and frameworks. Technology and all things creative are my passions. Hard worker and lifetime student.

EXPERIENCE

Front-End Engineer | The Iron Yard | 2016-2017

- Built fully functional and production-quality web applications and websites.
- Created robust and clean interfaces as well as optimized designs for desktop and mobile.
- Gained knowledge around best development practices, tools and techniques.
- Completed daily and weekend projects on Github both individual and collaboratively.
- Developed several applications utilizing AngularJS, HTML, CSS, AJAX, Sass, Foundation, Gulp and more.
- Utilized Agile development to complete final project in three weeks.

Sr. Technical Recruiter | ettain group | 2011-2016

- Promoted twice as a result of leading by example, candidate placements, and sales production.
- Gathered requirements, scope and objectives to identify the client's business needs.
- Responsible for all steps associated with identification, placement and management of contingent employees.
- Executed strong communication channels with internal and external clients trained for IT support.
- Provided professional, career-advancement consulting to hundreds of IT candidates and consultants.
- Mentored and trained new hires on best practices.
- Sponsored, promoted and attended networking events in the local tech community.
